

AAYUSH SINGH

Lead Frontend Engineer | React Architect

Ghaziabad, NCR, India · Open to Bengaluru / Hyderabad / Gurugram / Noida & Remote
aayushsinghm16@gmail.com | +91-9582707868 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

SUMMARY

Lead Frontend Engineer with 11+ years building scalable, high-performance web platforms in React, TypeScript, and Next.js. End-to-end ownership of frontend architecture — authentication systems, design systems, micro-frontends, and SSR platforms — across fintech, e-commerce, and SaaS products serving 1M+ users. Lead and mentor engineering teams, set technical direction, and raise performance, accessibility, and testing standards.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3 / SASS

Frameworks & Libraries: React.js, Next.js 15, Vue.js, Nuxt.js, Redux, Zustand, React Query, React Hook Form, Context API

Architecture: Frontend Architecture, Micro-frontends, Design Systems, System Design, NX Monorepo, SSR / Hydration

APIs & Backend: GraphQL, REST, Node.js, Express.js

Tooling & Testing: Vite, Webpack, Jest, React Testing Library, TDD, CI/CD, Git, Storybook, Algolia

Leadership & Practices: Technical Leadership & Mentoring, Cross-functional Collaboration, Stakeholder Communication, WCAG 2.1 AA Accessibility, Performance Optimization, Agile / Scrum

EXPERIENCE

Lead Frontend Engineer (Senior Experience Engineer) — Publicis Sapient (Contract) Aug 2025 – Mar 2026

Client: Goodyear · Gurugram, India (Hybrid)

- Joined one of 5 delivery pods and was promoted to lead the pod within weeks — owning solution design, architectural planning, and implementation guidance for other developers.
- Designed centralized, shared features and had them reviewed by the senior architect before rollout; unblocked the team on debugging and complex problems.
- Architected the authentication flow and all user-related modules — sign-in, registration, password reset, user profile, and address components — on Next.js 15, TypeScript, and GraphQL.
- Owned Order History and Order Details end-to-end for the Goodyear e-commerce platform, across multiple fulfillment types on a shared Design System.
- Engineered NX Monorepo platform infrastructure for 5 brands and 12 locales (CSRF protection, GraphQL proxy for server-side credentials, React Query SSR) and migrated state to Zustand to reduce re-renders.
- Coordinated across teams to finalize API contracts and delivered WCAG 2.1 AA compliance with zero audit violations.

Software Development Engineer 2, Frontend — SigFig

Mar 2022 – Jan 2025

Digital wealth-management & robo-advisory platform (1M+ users via banking partners) · Remote

- Reduced application load times by ~45% through code-splitting, React.memo, and client-side caching across the wealth-management platform.
- Built dynamic, schema-driven questionnaires and forms (React Hook Form, TypeScript) for investment, suitability, and regulatory flows, with field-level validation and error handling.
- Delivered core fintech modules — employer-sponsored plans, brokerage 'add funds', and new-client onboarding — in a shared core repo consumed by all banking partners.
- Architected a per-partner repo model: partners inherit shared features from the core repo with custom modifications layered per bank; delivered builds for two new bank partners.
- Rebuilt the questionnaire 'playback' feature for Contentstack data, migrating from an object-based to an array-of-objects model to overcome a 100-object limit and scale detail rendering.
- Developed a React-PDF generator letting users download their portfolio/proposal as a PDF; maintained WCAG 2.1 AA accessibility and strong Jest/RTL coverage (TDD).

Senior Frontend Developer — Core Value Technologies

Jul 2021 – Mar 2022

E-commerce SaaS · Remote

- Built a React.js merchant dashboard with real-time analytics (HTML5, CSS3, Tailwind CSS) enabling merchants to create dynamic, personalized storefront content.
- Implemented internationalization with react-intl across 12 locales with REST API integration; reduced delivery time via a reusable component library.

Senior Frontend Developer — Foyr (RBJ Technologies)

Apr 2019 – Jul 2021

Browser-based real-time 3D interior-design platform (100K+ designers, 30+ countries) · Hyderabad, India

- Main frontend engineer for the core user-facing application — built it from scratch to production (Vue.js, Nuxt.js, Vuex): frontend authentication wired to the backend, dashboards, and all primary pages.
- Engineered a Vue.js interaction layer on top of the Three.js engine with a custom middleware for bidirectional sync — a property change in Vue (e.g. object height) calls into Three.js to update the 3D/2D canvas in real time, and vice versa.
- Integrated Algolia-powered product search so users can find and drop objects into their designs via Vue components; built a render/image enhancer for brand logos, filters, and export edits.
- Created a molecules-and-components design system to eliminate duplicate UI and maximize reuse; trained and mentored 2 junior engineers.

Independent Frontend & GenAI Engineer (Career Focus Period)

Jan 2025 – Aug 2025

- Upskilled in GenAI tooling (Model Context Protocol, Claude Code, LLM workflows, prompt engineering) and shipped QuizKode — an AI-powered quiz platform on Next.js + TypeScript with real-time code evaluation, deployed on Vercel.

EARLIER EXPERIENCE

- Senior Developer, Grarri Pvt. Ltd. (2018–2019) — Angular.js / Node.js / MongoDB template & configuration platform.
- Software Engineer, IIT Delhi (2015–2016) — built the Rural Housing Knowledge Network portal (Python, Flask, MongoDB).
- Freelance Web Developer (2014–2018) — end-to-end web apps for small-business clients. Began career in telecom/RF engineering (2012–2014).

PROJECTS

- **QuizKode** — AI-powered quiz platform with real-time code evaluation (Next.js, TypeScript, Vercel). quizkode.com
- **Personal Portfolio** — Next.js site (98/100 Lighthouse) with Webpack optimization and Framer Motion. aayushsingh-portfolio.vercel.app

CERTIFICATIONS & EDUCATION

- Cutshort Certified — React.js (Advanced), JavaScript (Advanced) · IBM — Generative AI & Prompt Engineering.
- B.Tech, Electronics & Communication — GRD-IMT, Dehradun (Uttarakhand Technical University), 2012.
